OVERVIEW AND ANALYSIS

Dynamically skilled Extended reality developer. With a major in Immersive reality and classes in human-centered design, 3D Design, quantitative/qualitative research methods, and product design, I bring a unique perspective on collaborative design projects with ever-changing technology. Proven leadership through extracurriculars and professional roles in innovation groups, I excel in collaboration and team-oriented environments, whether in person or virtual. With a drive and initiative to lead and affect positive change, I'm passionate about driving innovation and delivering exceptional user experiences. With a can-do attitude
